

Make a file for students marksheet and display in format.

```
#include <stdio.h>
#include <string.h>
#include <stdlib.h>

struct Student {
    char name[50];
    int rollno;
    float marks;
};

int main() {
    const char *fileName = "student_data.txt";
    FILE *file;
    struct Student students[2];
    char line[100];
    char *token;
    int i;

    // Input data for two students
    for (i = 0; i < 2; i++) {
        printf("Enter details for student %d:\n", i + 1);

        printf("Enter name: ");
        scanf("%s", &students[i].name);

        printf("Enter roll number: ");
        scanf("%d", &students[i].rollno);

        printf("Enter marks: ");
```

```
scanf("%f", &students[i].marks);  
}
```

```
// Write data to the file
```

```
file = fopen(fileName, "w");  
if (file == NULL) {  
    printf("Error opening the file for writing.\n");  
    return 1;  
}
```

```
for (i = 0; i < 2; i++) {  
    fprintf(file, "%s,%d,%.2f\n", students[i].name, students[i].rollno, students[i].marks);  
}  
fclose(file);  
printf("\nData written to file successfully.\n");
```

```
// Read data from the file
```

```
file = fopen(fileName, "r");  
if (file == NULL) {  
    printf("Error opening the file for reading.\n");  
    return 1;  
}
```

```
// Print the table header
```

```
printf("\n| Name      | Roll No | Marks  |\n");  
printf("|-----|-----|-----|\n");
```

```
// Read each line and parse the data
```

```
for (i = 0; i < 2; i++) {  
    if (fgets(line, sizeof(line), file) != NULL) {
```

```

    token = strtok(line, ",");    // Get the name
    if (token != NULL) strcpy(students[i].name, token);

    token = strtok(NULL, ",");    // Get the roll number
    if (token != NULL) students[i].rollno = atoi(token); //ASCII to integer

    token = strtok(NULL, ",");    // Get the marks
    if (token != NULL) students[i].marks = atof(token); //ASCII to float

    // Print the student data
    printf("| %-14s | %-7d | %-7.2f |\n", students[i].name, students[i].rollno,
students[i].marks);
}
}

fclose(file);
getch();
}

```

Count Words, Characters and Line from the file.

```

#include<stdio.h>
#include<conio.h>
void main()
{
    FILE *fp;
    char c;
    int w=0,ch=0,i=0;
    clrscr();
    printf("Input data ");
    // fp=fopen("X://SS//Demo2.txt","w");
    fp=fopen("Demo2.txt","w");

```

```

while((c=getchar())!=EOF)
{
    putc(c,fp);
}
fclose(fp);
printf("OUTPUT");
// fp=fopen("X://SS//Demo2.txt","r");
fp=fopen("Demo2.txt","r");
while((c=getc(fp))!=EOF)
{
    ch++;
    if(c==' ')
    {
        w++;
    }
    if(c=='\n')
    {
        i++;
        w++;
        ch--;
    }
}

printf("\nchar:- %d",ch);
printf("\nline is:- %d",i);
printf("\nWord is:- %d",w);
fclose(fp);
getch();
}

```
